❖ Summary:

A highly motivated software engineering student at Aptech with expertise in both frontend and backend development. Skilled in **HTML, CSS, Bootstrap, JavaScript, Angular, PHP, MySQL, Laravel, and ASP.NET Core MVC**. Passionate about problem-solving, writing clean code, and developing scalable web applications. Currently expanding knowledge in **.NET development** to strengthen full-stack capabilities.

❖ Skills:

- **Frontend Technologies: HTML, CSS, Bootstrap5, Angular.**
- **Programming Languages: JavaScript, PHP, ASP.NET Core MVC.**
- **Backend & Frameworks: Laravel, .NET.**
- **Databases: MYSQL, SQL Server Management Studio.**
- **Tools: GIT (Version Control).**

❖ Education:

- SOFTWARE ENGINEERING | Aptech | 2023-Present.
- INTERMEDIATE | Govt Comprehensive College | 2024-2026.
- MATRICULATION | St Paul's English High School Campus "B" | 2011-2022.

❖ Projects:

- **GYM Website | Personal Project**
  Design and Developed a Full-Stack Website Using PHP. Implemented features like a protein shopping cart, user and trainer authentication, admin panel for managing orders, memberships, and users, as well as a custom gym ID card generation.

- **Festivals BLOG Website | Personal Project**
  Design and Developed a Static Website Using HTML, CSS, JavaScript. Included religious blogs (Muslim, Hindu, Christian, Sikh) with festival details and integrated animations using the AOS library.

- **Restaurant Website | Personal Project**
  Design and Developed a Static Website Using HTML, CSS, JavaScript. Implemented features such as a menu section, chef's section, table booking system (with details submitted via Email.js), and a photo gallery of the restaurant.
